PLUG VALVES

Plug valves for use in gas drilling, cementing, fracturing, production and well-servicing operations and similar high pressure liquid control applications. These quarter-turn plug valves feature compact design, ease of maintenance, low torque and quick opening.

Both the inlet and outlet feature 1502 union connections (other styles available on request). The valves can be easily opened or closed under 10,000PSI.

Low maintenance cost and high reliability mean a better bottom line for you.

Working Pressure	5000~10000
Product Specification Level	PSL1~3
Performance Requirement Level	PR1 & 2
Nominal Size	2in ~4in
Material Class	AA thru FF
Working Temperature	-20f ~ 249f
